WORK EXPERIENCE

Back-end Developer Intern
Kshipra IT Solutions Pvt Ltd

07/2023 - 09/2023   *Noida, India*

Achievements/Tasks
- During this enriching journey, I had the privilege to work alongside a talented team of professionals who guided and mentored me throughout the internship.
- I was fortunate to work on a variety of projects that honed my skills in Node.js and Express.js. From building RESTful APIs to crafting dynamic web applications.
- This experience has deepened my understanding of server-side development and equipped me with valuable tools for future endeavors.

PERSONAL PROJECTS

E-commerce Clone (07/2023 - 08/2023)
- The E-commerce Platform Clone project aims to create a fully functional and user-friendly e-commerce website by leveraging the power of the MERN (MongoDB, Express.js, React, Node.js) stack.
- Featurers - User Authentication and Authorization, Shopping Cart, Product Listings, Product Details, Checkout, Filters, Admin Panel.

PDF-Merger (05/2023 - 05/2023)
- I worked on a PDF merger project where I developed a software application to merge two PDF files into a single document.
- Utilised open-source server environment Node.js and Express.js as a small framework that works on top of Node.js web server functionality to simplify its APIs and add helpful new features to design and develop the PDF merger application.

Tesla Clone (05/2023 - 05/2023)
- The goal of this project was to develop a visually appealing and interactive website that emulated the design and functionality of the official Tesla website.
- Utilised HTML, CSS, and JavaScript to develop the front-end of the Tesla clone website. Features : Landing Page, Menu page.

Typing Website (04/2023 - 04/2023)
- I contributed to a project focused on creating a dynamic and interactive typing website. Utilised HTML, CSS, and JavaScript to develop the user interface of the typing website.
- Implemented functionality to track user progress, including metrics such as typing speed, accuracy rate, and words per minute.
